PROGRAM

Expansion of fitness center into 2500 sf with equipment, locker room facilities and sauna.

DESCRIPTION

The James at River House in Arlington, Virginia sought to expand their on-site 500-sf fitness room into a 2,500-sf state-of-the-art fitness facility, available to the residents of the stylish apartment community. The renovation and expansion included additional amenities, such as space for expanded exercise equipment and an open area for a variety of classes, locker rooms, and showers. In addition, the renovation included the addition of a sauna.

WDG's redesign of the space centers around a striking mosaic of circular motifs, which is continued in the spherical light fixtures and in the circular prints on the carpet. The overall light color palette gives the space a comfortably inviting and less intimidating atmosphere.
